Techie Kids Programs... We're New in Town
Techie Kids Creates Bright Futures for Kids Thru Technology & Media

Miami, FL (Feb. 11, 2011) – **Techie Kids Programs** is a Miami-based organization that offers technology and media focused programs to children, ages 8 - 17, who participate in programs at partnering organizations and schools. At Techie Kids it's understood that all kids are S.M.A.R.T. - sharp, motivated, artistic, resourceful, and talented – and with a little guidance, some training and lots of support kids can do anything they set their minds to.

Kids in the current generation have never lived without technology. Since technology is now part of everyday life, there are very few children who aren't technically savvy and adept at using tech gadgets. This is why our workshops are designed to encourage a child's creativity, stimulate their minds and prepare them for career possibilities in technology and media.

OUR MISSION:|

To inspire kids and teens - through technology and media - to discover their own unique gifts and abilities in order to create bright futures for them as well as make a difference in their lives and the communities in which they live. This mission includes hosting workshops and events to help kids understand the roles education, talent, and teamwork play in technology and media today.

OUR FOCUS:

- **Information Technology (IT)** - Computer programming; includes video game development, animation production, basic app development; computer repair; and robotics
- **Creative Tech** - Web and graphics design, desktop publishing and music production.
- **Media** – Journalism (video production/scriptwriting, online publishing/creating blogs), on-air personality/DJ; and online marketing.
